**CONNELLY SPRINGS MAN
LOST PURSE AND MONEY**
Mr. L. B. Abernethy of Connelly Springs writes the Record that he lost his purse on No. 15 Friday and every cent he had. "Possibly some honest man found them. I am a poor man with family to feed and it was my all." The purse contained a \$20 bill, a \$5 bill, one \$2 bill and some \$1 bills. The Record hopes that the person who found the purse will return it to the owner.

**Bigger Worth
A Bear for Wear**

YOU'VE probably often thought that somebody some time would produce Tires and Tubes that would leave no complaint as to wear. You were right. That time has arrived. The discovery of how to produce a tire and tube resistance and strength has been made. It is the Gillette Chilled Rubber Process - the perfected method. Toughens rubber as iron is toughened by changing to steel - building up endurance and bringing down costs to the lowest figures of economy. Absolutely the biggest worth-in-service - in mileage - ever offered Tire and Tube buyers. One Gillette is bound to sell you a set.

But we can't continue increasing our production unless we continue increasing our railroad facilities.

The farms, mines and factories cannot increase their output beyond the capacity of the railroads to haul their products.

Railroads are now near the peak of their carrying capacity.

Without railroad expansion—more engines, more cars, more tracks, more terminals—there can be little increase in production.

But this country of ours is going to keep right on growing—and the railroads must grow with it.

To command in the investment markets the flow of new capital to expand railroad facilities—and so increase production—there must be public confidence in the future earning power of railroads.

The nation's business can only grow as fast as the railroads grow.
